

MADE IN GERMANY

BP60

The SEBO BP60 offers durability and performance in a high quality cordless vacuum cleaner with a full 60 minutes runtime from its powerful 308 Wh battery.

No sockets, no problem - The BP60 is ideal for cleaning non-stop, without needing to plug and unplug.

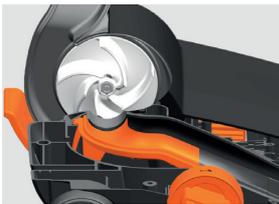

The 4-layer microfibre bag has such high filtration that no other filter is required. The highly efficient toothed timing belts are fully protected by an auto-shut-off system. The battery and motor are located at the base of the machine, so the BP60 has a very low handle weight for comfortable use.

Microfibre Bag

Efficient Impeller Technology

An impeller with up to 17,000 rpm is driven by a timing belt. The impeller sucks in the dirt picked-up by the rotating brush and transports it through the air channel into the filter bag.

Powerful Battery

The SEBO POWER UNIT offers an extremely long runtime of 60 minutes under full workload. The charging time of the POWER UNIT is only 250 minutes.

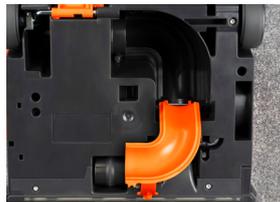

Safety Features

In the case of a blockage or overload, the unit switches off automatically. In the locked, upright position (park position), the brush lifts to protect the floor.

Multi-layer Microfibre Bag

The SEBO BP60 has a sealable four-layer electret filter bag with ultra-fine microfiltration and a large volume of 5.5 litres.

Practical Cleaning Access

The cleaning flap on the bottom of the power head allows easy access into the air channel to remove blockages.

Removable Brush Roller

The brush roller can easily be removed, without tools, for replacement or to remove tangled hairs and fibres.

Foot operated
ON/OFF switch

Easily removable and
replaceable battery
