

MADE IN GERMANY

SEBO Felix

The SEBO Felix is designed to be floor friendly and easy to use. It smoothly steers around furniture and can reach under it too. Variable suction, brush on/off control and manual height adjustment means you can choose the optimum combination for any floor.

With its twin-motor design, the powerhead can be removed at the push of a button and the suction unit can then be used for car cleaning or for the stairs. A range of other cleaning heads can be fitted in place of the powerhead, including a polisher, parquet brush, or combination nozzle. The Felix with its adjustable handle height can be conveniently stored in confined spaces.

S-Class filtration and the Ultra Bag means that once dust has been picked up, you never have to see it or breathe it, again.

Twin Motor Design

The Felix range uses a separate 700W suction motor and 175W brush motor. This allows the powerhead to have a very low profile for reaching under furniture.

Brush on/off

The brush roller on the powerhead can be switched off for delicate floors using the foot operated brush on/off button.

Swivel Neck

For congested areas and getting around furniture, the Felix features a rotating swivel neck which gives the ultimate manoeuvrability.

SEBO Felix *Contemporary Collection*

The SEBO Felix contemporary collection is available in a stunning and stylish range of colours and designs; with interchangeable filters whenever you fancy a restyle!

Quality, performance, and reliability whilst adding a touch of style to your cleaning routine.

we make from our pink ribbon range will be
donated to The Pink Ribbon Foundation

The Pink Ribbon Foundation is a grant-making trust with a mission to fund projects and provide financial support to UK charities which relieve the needs of people who are suffering from, have been affected by breast cancer, or who work to advance the understanding of breast cancer and its early detection and treatment.

Charity Number: 1080839

SEBO Felix Pet

The Felix Pet vacuum cleaner features S-Class filtration and activated charcoal for odour removal. It includes a Stair and Upholstery Turbo brush, which lifts carpet pile and gives superior fibre and hair pick up compared to a standard upholstery nozzle.

SEBO DISCO - Floor Polisher Head

The DISCO polisher attachment is the perfect choice for maintaining smooth floors. It's simple to use and moves across the floor with ease, giving a beautiful gloss finish.

The DISCO fits in place of the normal power head, which means that the Felix will vacuum and polish at the same time. The powerful suction removes fine particles leaving the floor dust-free, whilst the highly efficient 2000U/min ultra high-speed floor polisher creates a brilliant gloss surface. The result is a spotlessly clean floor with a hygienic shine.

Key Features

Highly manoeuvrable swivel neck

On/Off switch with integrated variable power

Removable powerhead

Easily removable brush roller

Unique Exhaust Filter

The Felix exhaust filter wraps around the body of the machine. This gives it a huge surface area for efficient filtration and it also diffuses the exhaust air, so that it doesn't disturb its environment. The textile outer layer lets you customise the appearance of the vacuum and also protects the body

Adjustable Handle Height

A great feature of the Felix, is that you can change the handle height. The 3 handle height positions available mean that you can choose a height that is comfortable for using the machine and when it comes to putting it away, you can lower the handle to its lowest position.

S-Class Filtration

SEBO filters give highly effective filtration and excellent airflow, by harnessing the power of electrostatic attraction. They let the air pass through easily, but literally pull the particles out of the airstream and hold onto them with their static charge. We regard this as the ultimate filtration technology.

To meet the S-Class standard the filtration system has to remove a minimum of 99.97% of particles of 0.3 microns. The SEBO S-Class system will remove 100% of particles of 1 micron and above.

The Ultra Bag

Made from the same material as medical masks, the SEBO Ultra Bag safely retains virtually all dust that is picked up. Using multiple layers of electrostatic fleece, they fill to the top and remain pure white on the outside, even if full of fine dust. They keep the inside of the vacuum spotlessly clean, prolonging the life of the other filters and of course, they allow completely hygienic disposal of dirt.
